ABSTRACT

In this project Book Library Application is a system which maintains the information about the books present in the library, their authors. This is very difficult to organize manually. Maintenance of all this information manually is a very complex task. Owing to the advancement of technology, organization of an Online Book Library becomes much simple. The Book Library Application has been designed to computerize .This computerization of library helps in many instances of its maintenances. It reduces the workload of management as most of the manual work done is reduced

This project is an Android App which aims to provide a solution to manage a Book Library. Designed for all Users. Book Library Application is a project which aims in developing a computerized system to give the list of books present in the library . The Book library Application is the best way possible and also reduce the human efforts.
